

# Economics

## General Information

Economics provides a solid base for understanding the various aspects of business economics and how these affect our daily decisions. You will be introduced to economic principles and explore specific economic applications.

This course will also teach you about the relationship between various parts of the economy and use several economic models to illustrate these relationships.

## Who will benefit most?

This course will benefit managers, researchers, executives and individuals who have a foundational understanding of economics and require a sound knowledge of economic principles and applications.

## Duration

2-day course contact time including facilitation and group activities

## Learning Outcomes

Upon completing this course, participants should be able to:

- Understand key economic terminologies and concepts
- Distinguish between the macro- and micro-economic environment
- Explain the impact of global and domestic social-political and economic trends on organisations
- Evaluate the triple bottom line within the context of economics

## Certification

- A Certificate of Competence will be awarded to all students who successfully submit and pass their assignments, and exams\*
- A Certificate of Completion will be awarded to all students who successfully submit and pass their assignments
- A Certificate of Attendance will be awarded to students who attended the training session

\* These students may be considered for credits towards relevant qualifications.
